- ❑ Services
- ❑ Higher Education
- ❑ Energy
- ❑ Research
- ❑ Process Production
- ❑ Meat Industry
- ❑ Retail
- ❑ Hospitality
- ❑ Transport
- ❑ IT

Change - the main constant in management!

Our Competitive Advantages:

Holistic Management and Unprecedented Integration

A Unique, Natively Integrated Solution:

Forget about data silos and managing multiple disparate systems! EMSYS natively integrates all the critical functionalities you need: **ERP, CRM, BI, BPM, Document Management (DM), Asset Management, Project Management, HR, E-learning, Digital Signature, Smart Emails, Registry, and much more.**

360° Vision and Informed Decisions:

Centralizing all operational and management data into a single location provides you with a complete, coherent, and **real-time** overview of your business. Make fast strategic decisions based on precise, up-to-date information.

Total Automation: ERP and Non-ERP:

EMSYS is not limited to traditional ERP processes. We automate a vast range of workflows, from financial and human resources to specific non-ERP departmental processes, ensuring comprehensive digitalization and maximum operational efficiency.

Our Competitive Advantages:

Revolutionary Agility through 'No-Code'

No-Code Personalization:

We empower business users! With EMSYS, you can configure, customize, and model workflows and reports directly from the interface, without writing a single line of code. This significantly reduces dependency on the IT department and accelerates response times to market changes.

Customizable Workspace:

Every user can personalize their interface and dashboards, tailoring them to their specific role and preferences for an intuitive user experience and enhanced productivity.

Breaking Free from Rigid Structures:

"No-Code" flexibility means ultimate freedom in defining data structures and fields, eliminating the constraints of traditional solutions and adapting perfectly to your unique business needs.

Fast and Efficient Implementations:

Thanks to its "No-Code" nature and agile architecture, EMSYS implementations are significantly faster, allowing you to realize the value of the platform in record time.

Our Competitive Advantages:

Absolute Reliability: 'Zero Downtime' and Continuous Availability

Uninterrupted Operations:

For your business, every second counts. EMSYS guarantees "Zero Downtime," ensuring continuous system availability. This eliminates productivity and revenue losses caused by disruptions, reinforcing confidence in critical operations.

Zero-Impact Updates:

We perform version upgrades, patches, and maintenance without interrupting the service. Your investment is protected, and the system is always up to date without impacting daily operations..

Configuration Persistence:

Custom modeling and configurations made within the system are persistent and fully compatible with future versions, guaranteeing continuity and protecting your long-term investment.

Our Competitive Advantages:

Granular Control and Real-Time Performance

Instant Transaction Reflection:

Every transaction processed by a single user is immediately reflected across the entire management system, providing an exact and up-to-date picture of operations and performance.

Operational-Management Separation:

EMSYS clearly distinguishes between the operational (transactional) system and the management (analytical) system, optimizing the performance of both and providing powerful tools for strategic decisions without overloading resources.

Performance Measurement Across Any Management Dimension or Analysis:

*Define and analyze business performance across any management dimension: **business units, profit centers, budgets, products, customers, projects**, or any other dimension relevant to you. Gain deep granularity for optimization.*

Financial Flow-Based Management:

*Advanced tools for the detailed monitoring and analysis of financial flows (**Cash Flow**), essential for liquidity management, working capital optimization, and increasing profitability.*

Our Competitive Advantages:

Technological and Deployment Flexibility:

Compatible Databases:

*EMSYS is compatible with top-tier databases such as **Oracle**, **MS SQL Server**, and **PostgreSQL**, providing flexibility and seamless integration with your existing IT infrastructure.*

On-Premise or Cloud-Agnostic Deployment:

*Choose the deployment model that best suits your needs: on your own servers (**on-premise**) or in any cloud environment (**cloud-agnostic**), including your own cloud resources.*

Flexible Acquisition (SaaS or Licensing):

*You can acquire EMSYS as a service (**SaaS**), reducing initial costs and infrastructure management complexity, or as a license hosted within your own resources.*

Integration with External Systems:

*It integrates natively with a wide range of essential applications (**LDAP**, **Active Directory**, **Facebook**, **Google**, **GitHub**, etc.) and can be connected to regulatory systems, ensuring a coherent and compliant software ecosystem.*

Integrated Open-Source Products:

*The smart utilization of **open-source** products helps reduce the **Total Cost of Ownership (TCO)** without compromising on performance or security.*

EMSYS - A Versatile Solution for All Industries

Multinationals and Holdings:

For a consolidated overview and centralized control over geographically dispersed operations.

Large, Medium, and Small Organizations:

From companies with thousands of employees to growing businesses, EMSYS scales according to your needs.

Public and Private Sectors:

Its adaptable functionalities meet the specific requirements of both sectors.

Diverse Industries, Proven by Projects:

With vast experience and successful projects across various fields, EMSYS understands the unique characteristics of every industry.

Accounting is a Result of Operational Processes

Utilities

- Clients & Contracts
- Services and Tariffs
- Meters
- Consumption
- Invoicing
- Collections
- Debt Recovery & Contractual Discipline
- Call Center

EMSYS Modules - II

Insurance

- Non-life, Life, Health
- Product Configuration
- Questionnaires
- Offerings, Quotation
- Policy Management
- Underwriting
- Collections
- Reserves, Claims
- Commissions
- Reinsurance

Resort Management

- Bookings
- Point of Sales
- Kitchen Management
- Mobility
- Collections
- Claims
- Competencies

University

- Academic Structures
- Curriculum
- Students' Life Cycle
- Fees
- Scholarships
- Cafeteria
- Hostel
- Graduation Process
- Students' Portal

TMS

- Parcel, LTL, FTL, LCL, FCL, ADR, Bulk
- 1PL, 2PL, 3PL, 4PL
- Road, Railway, Intermodal
- Fleet management
- Order management
- Transportation planning
- Route maps
- Tracking processes
- Portal

BI & CPM

- Financial Analytics
- HR Analytics
- Sales Analytics
- Procurements Analytics
- Insurance Analytics
- Utility Analytics
- Performance Management
